Computer Engineering Student

Casablanca, Morocco

Drawn to the challenges of data engineering and software development, I enjoy designing efficient and optimized solutions. I am looking for an internship to further develop my skills and contribute to innovative projects.

Education

- **Engineering Degree in Big Data and Cloud Computing** 2023-2026
École Normale Supérieure de l'Enseignement Technique, Hassan 2 University, Mohammédia, Morocco
- **Professional Bachelor's Degree in Information and Communication Systems Development** 2022-2023
École Supérieure de Technologie, Moulay Ismaïl, Meknès University, Morocco
- **University Diploma in Computer Engineering, Specialization: Software Engineering** 2020-2022
École Supérieure de Technologie, Moulay Ismaïl University, Meknès, Morocco

Skills

- **Web Development:** HTML5, CSS3, JavaScript, Node.js, Spring boot, Angular, PHP
- **Software Engineering:** Java, JEE (Spring Boot, Hibernate), REST API
- **Data Engineering:** ETL/ELT, Orchestration (Airflow), Data Streaming (Kafka), Apache Spark, Hadoop
- **DevOps Engineering:** Git, GitHub, Docker, Maven, Gradle, Kubernetes, Oracle Cloud
- **Database Management:** MySQL, PostgreSQL, MongoDB, Oracle, Cassandra, HBase, Redis
- **Machine Learning:** Regression, Classification, scikit-learn

Experience

- **Data Engineer @ Maroc Traitement de Transactions (M2T)** August 2024 - September 2024
Design and development of an ETL pipeline to transfer data from a data lake to a warehouse, with the creation of dashboards using Matplotlib for visualization and analysis.
Technologies: Docker, Apache Airflow, Apache Hive, HDFS, Python (Pandas, PySpark, Matplotlib), SQL
- **Systems Automation @ Business IT Solutions** April 2023 - June 2023
Design and development of a web application automating the migration from a monolithic JEE system to Spring Boot microservices.
Technologies: Spring Boot, Angular, REST API, TypeScript, JBoss, PostgreSQL, JBoss Forge, JWT
- **Data Engineer @ INTELLCAP** April 2022 - June 2022
Development of a data pipeline based on the Medallion architecture, with ingestion, orchestration, and transformation of data. Secured via Azure Key Vault and automated with Azure Data Factory.
Technologies: Azure Data Factory, Databricks, dbt, Azure Data Lake Gen2, Azure Key Vault, SQL
- **Python Developer @ QIT Solutions** July 2021 - August 2021
Development of a fleet management application, including vehicle tracking, maintenance management, and report generation.
Technologies: Python, Pandas, MySQL, Tkinter, SQLAlchemy, Matplotlib

Projects

- **Multimodal Educational Chatbot with RAG Architecture (Java/Python/JavaFX/LangChain/ChromaDB)**
Development of a multimodal chatbot for ENSET, integrating text and image processing to answer students' questions.
- **COVID-19 Prevention System (Machine Learning / Raspberry Pi / Python)**
Development of an intelligent access control system for public spaces, using mask detection and temperature measurement, with epidemiological tracking and real-time monitoring.
- **Data Pipeline for the Premier League (Jsoup/Bash/Kafka/Airflow/PostgreSQL)**
Design of an automated ETL system to collect and analyze real-time sports statistics, including data cleaning and the generation of analytical dashboards.
